Summary

Collection Title:

Henry Charlton Bastian papers, 1841-1932 and undated bulk 1870-1920

Creator:

Bastian, H. Charlton

Source:

Josiah Charles Trent History of Medicine Collections (Duke University)

Abstract:

Prominent British scientist active in the late 19th and early 20th centuries, known for his work on spontaneous generation (abiogenesis) and neurological science. Collection dates from 1841-1932 and documents Bastian's rise as a neuroscientist, biologist, writer, and researcher, and encompasses typed and manuscript correspondence, research notes, offprints, handwritten drafts, early scientific photographs, pencil and ink drawings, and professional reviews and accolades. The largest series contains correspondence dating from 1856 to 1932, from prominent scientists, neurologists, scholars, publishers, assistants, and friends, including Louis Pasteur, Caleb Saleeby, Thomas Huxley, Sir John Bretland Farmer, Aristide Pratelle, William Paton Ker; there are also letters written by Bastian, including exchanges with the Académie des Sciences in France. The materials chiefly concern Bastian's early 20th century work on abiogenesis, but also on aphasia and paralysis. The collection also contains numerous pieces of correspondence addressed to Bastian's daughter, Sybil Bastian, who was also a scientist, and his wife Julia. Other materials include obituaries, condolence letters, Christmas cards, and newspaper clippings. Acquired as part of the History of Medicine Collections at Duke University.

Background

Scope and Content

The Henry Charlton Bastian collection dates from 1841 to 1932, with the bulk of the materials falling between 1870 and 1920. The papers document Bastian's rise as a neurologist, writer, and researcher, and encompass typed and manuscript correspondence, research notes, offprints, articles, handwritten drafts, early scientific photographs, pencil and ink drawings, and professional reviews and accolades.

The bulk of the collection is made up of correspondence dating from 1856-1932, chiefly from prominent scientists, neurologists, scholars, publishers, assistants, and friends--including Louis Pasteur, Caleb Saleeby, Thomas Huxley and his wife Annie, Sir John Bretland Farmer, Aristide Pratelle, and William Paton Ker, among many others. There is a group of testimonial letters from fellow scientists. There are a number of outgoing pieces as well written by Bastian which include exchanges with the Académie des sciences of France. The correspondence as well as the research notes and writings chiefly concern Bastian's work on abiogenesis, but also his neurological research on aphasia and paralysis. The collection also contains numerous pieces of correspondence addressed to Bastian's daughter, Sybil Bastian, who was also a scientist, and Bastian's wife Julia; there are in particular many condolence letters received following Bastian's death in 1915. The professional papers include Bastian's research drawings and early photomicrographs, reviews of his work, reprints, and diplomas. Other materials are more personal, and include obituaries, Christmas cards, and a newspaper clipping reporting the details of London's 1919 victory march.

Acquired as part of the History of Medicine Collections at Duke University.

Biographical/Historical

Henry Charlton Bastian (1837-1915), born in Truro, Cornwall, was a pioneer in the field of neurology. He studied at University College, London and was elected a fellow of the Royal Society of London. Bastian was known for his works on

aphasia, the loss of the ability to express or understand speech due to brain damage. He also demonstrated Bastian's Law, which holds that the complete section of the upper spinal cord abolishes reflexes and muscular tone below the level of the lesion. He published various works on paralysis and coined the term kinesthesia to describe the sense of body motion. Bastian was also known for his work on abiogenesis, less accurately known as spontaneous generation. Bastian, in sharp contrast to Pasteur, Koch, Huxley and Darwin, controversially argued that there was no fixed boundary between living and nonliving organic matter and that the processes that generated life in an earlier stage could still be operating in the present. His experiments, however, could not be reproduced, and his views were generally discredited in the profession.

Collection Inventory

Correspondence Series, 1856-1932 and undated, bulk 1870-1920

Physical Description: 3 boxes

Scope and Contents note

Correspondence, arranged chronologically, between Bastian and various notable scientists, scholars and doctors, such as Sir John Bretland Farmer, Thomas Huxley and his wife Annie, Louis Pasteur, William Paton Ker, Caleb Saleeby, Hector Grasset, William Pennington Cocks, and assistants Albert and Alexandre Mary. There is also a group of exchanges between Bastian and the Académie des Sciences of France. The majority of the correspondence is written to Bastian, but there are some drafts penned by Bastian. The correspondence frequently concerns Bastian's controversial work on abiogenesis. Also includes exchanges between Bastian and publishing companies, concerning translations of his numerous works; a series of letters appears from well-known publisher Félix Alcan from Metz. Bastian's wife, Julia, and daughter, Sybil also figure as recipients and writers of correspondence, with many condolence letters received after Bastian's death. Undated letters are placed at the end of the series and arranged alphabetically. Of interest among these is a manuscript document written after Bastian's death by his assistants, Albert and Alexandre verifying Bastian's experiments on the origin of life.

Cocks, William Pennington: Autograph holiday greetings letter with self-portrait in ink. 1 page, 1856 Dec. 24	Box 1

Professional Papers Series, 1841-1919 and undated

Physical Description: 1 box

Scope and Contents note

Materials relating to Bastian's professional development and research, including reprints of Bastian's work, research notes, scientific photographs, several diplomas, and reviews of publications and research. Subjects concern aphasia, paralysis, abiogenesis, and kinesthesia, among others. Arranged mostly chronologically, with undated items at the end.

Rumball, James Quilter: "Phrenological development." Printed form with manuscript evaluation of Bastian by Rumball. 2ff., 1841 Box 3

Apothecaries' Hall: Printed preliminary examination dated Mar. 18. 1 page., 1856	Box 3
Apothecaries' Hall: Printed notice certifying that Bastian had passed the Hall's examination. 1 page, 1856	Box 3
University of London: Bastian's Bachelor of Medicine diploma. 1 sheet, printed on parchment, 1863	Box 3
Bastian: Portfolio of 22 ink and pencil drawings of filaria and other scientific organisms, 1861-1862	Box 4
Photographs of cerebellum. Eleven photographs (some trimmed), in envelope addressed to Bastian, 1868	Box 4
Bastian: "Sensation and perception—I." In Nature, no. 8: 213-214. Whole number. Pencil correction by Bastian, 1869	Box 4
Bastian: "Sensation and perception—II." In Nature, no. 12: 309-311. Whole number, 1870	Box 4
Royal College of Physicians: Printed notice naming Bastian a Fellow of the Royal College of Physicians. 2 pp., 1870	Box 4
Sanderson, J. Burdon: "Preparations showing the results of certain experimental inquiries relating to the nature of the infective agent in pyaemia," 6 pp., 1872. With Bastian's marginal notes.	Box 4
Sanderson, J. Burdon: "Criticisms of Dr. Chauveau of Lyons on the discussion of the Pathological Society on pyaemia," cutting from British Medical Journal. Bastian's pencil notes in margin, 1872-1873	Box 4
Bastian: The evolution hypothesis, and the origin of life. Part II. Extract from Contemporary Review. 703-720 pp., 1874	Box 4

Review of Bastian's On Paralysis from Brain Disease in its Common Forms. Extract from Birmingham Medical Review. 217-222 pp. Docketed by Bastian, 1875	Box 4
Bastian: The brain as an organ of mind. Autograph manuscript outline. 4 pp., 1875	Box 4
Review of Bastian's On Paralysis from Brain Disease in its Common Forms. Extract from Glasgow Medical Journal. 523-528 pp. Docketed by Bastian, 1875	Box 4
New York World review of Bastian's On Paralysis from Brain Disease in its Common Forms. Cutting, 1875	Box 4
Bastian: "Paralysis from brain disease" . Additions and alterations. Autograph manuscript. 2 pp., 1876	Box 4
Bastian: Chap. XIII. "On the scope of mind or mental phenomena" . Autograph manuscript. 5 pp., 1877	Box 4
Tyndall, John: "Spontaneous generation" . Extract from The Nineteenth Century. Annotated in pencil by Bastian, 1877	Box 4
Medical Society, University College, London: List of members, Oct. 1, 1879. Broadsheet, 1879	Box 4
Macmillan and Co.: Statement sheet for Bastian's "Lowest Organisms." Printed sheet completed in manuscript, 1880	Box 4
Review of The Brain as an Organ of Mind. Cutting from the Pall Mall Gazette, 1880	Box 4
Review of The Brain as an Organ of Mind. Cutting from the St. James Gazette, 1880	Box 4
Notice of The Brain as an Organ of Mind. Cutting from Leeds Mercury. With cover, 1880	Box 4

Review of The Brain as an Organ of Mind. Extract from Liverpool Albion Press cutting, 1880	Box 4
Review of The Brain as an Organ of Mind. Extract from Daily Telegraph. Press cutting, 1880	Box 4
Chamberland, Ch.: "Thèses . . . Recherches sur l'origine et le développement des organismes microscopiques." Inscribed to Bastian, 1879	Box 4
The Saturday Review: "Authors and Publishers," Oct. 1882	Box 4
Reale Accademia di Medicina di Torino: Diploma issued to Bastian, 1883	Box 4
Boston Gynecological Society (Societas Gynecologica Bostoniensis): Diploma issued to Bastian, 1885	Box 4
Review of Bastian's Paralyses, Cerebral, Bulbar and Spinal. Extract from the Lancet, 1886	Box 4
Royal University of Ireland: Diploma issued to Bastian, 1887	Box 4
Bastian: Prospectus for Paralyses Cerebral, Bulbar and Spinal. 1 sheet. Annotated by Bastian, 1887	Box 4
Our portrait gallery: Henry Charlton Bastian. Extract from The Provincial Medical Journal, plus portrait, 1887	Box 4
Eminent medical men [profile of Bastian]. In The Family Doctor and People's Medical Advisor. Whole number, 1887	Box 4
Review of Bastian's Paralyses, Cerebral, Bulbar and Spinal. Cutting from British Medical Journal, 1887	Box 4
Bastian: Autograph document containing excerpt from a review in the Bristol Medical and Chirurgical Journal. 1 sheet, 1893	Box 4

Review of Various Forms of Hysterical or Functional Paralysis. Excerpt from The Medical Times and Hospital Gazette. 1 sheet, inscribed, 1893	Box 4
Bastian: Autograph notes. 1 sheet, 1893	Box 4
Review of Various Forms of Hysterical or Functional Paralysis. Cutting from Revue medicale de la Suisse Romande, 1893	Box 4
Review of Hysterical or Functional Paralysis. Extract from the Medical Press, 1894	Box 4
Bastian: The Beginnings of Life. Autograph document showing costs, receipts, etc., 1896	Box 4
Review of Various Forms of Hysterical or Functional Paralysis. Cutting from Montreal Medical Journal, 1893	Box 4
Review of Various Forms of Hysterical or Functional Paralysis. Extract from Birmingham Medical Review, 1893	Box 4
Review of Various Forms of Hysterical or Functional Paralysis. Extract from British Medical Journal, 1893	Box 4
Bastian: Autograph document containing excerpt from a favorable review. 1 sheet, 1893	Box 4
"Mr. Bastian and prepayment meters." Offprint from The Lightning. 1 page. Describes invention by Bastian's son, Charles Orme Bastian, 1897	Box 4
Review of Aphasia and Other Speech Defects. Cutting from the New York Medical Journal, 1898	Box 4
Review of Aphasia and Other Speech Defects. Press cutting from unidentified newspaper, 1898	Box 4

Review of Aphasia and Other Speech Defects. Press cutting from unidentified newspaper, 1898	Box 4
Errera, Leo: Essais de philosophie botanique. Offprint from Revue de l'Universite de Bruxelles, 1900. Discusses spontaneous generation.	Box 4
Williams & Norgate: Letter regarding pricing of Bastian's "Heterogenesis" . 1 sheet, 1901	Box 4
Bastian: "Notes sur la transformation dans le courant de trois ou quatre jours du contenu entier de l'oeuf de Hydratina Senta..." Typed document with autograph annotations. 9 pp., 1901	Box 4
Bastian; Linnean Society: Correspondence concerning the Society's rejection of Bastian's paper on the resting spores of Vaucheria. 4 pieces, 1901-3	Box 4
Bastian: "Second note on the transformation of the entire contents of the egg of Hydratina Senta into a large ciliate belonging to the genus Otostoma." Autograph manuscript. 2ff., 1902	Box 4
Bastian: "The evidence for heterogenesis." Offprint from The Medical Press and Circular. 4 pp., 2 copies, 1902	Box 4
Bastian: "Works up to 1903." Autograph document showing profits from 8 titles, 1903	Box 4
Bastian: "On some points in connexion with the ordinary development of Vaucheria resting-spores." Offprint from Annals and Magazine of Natural History, 1903	Box 4
Bastian: "On the relations between certain diatoms and the fission-products of a parasitic alga (Chlorochytrium)." Offprint from Annals and Magazine of Natural History, 1903	Box 4

Bastian: "The appearance of bacteria in normal organs and the significance thereof." Offprint from <i>Lancet</i> . 4 pp., unbound, 1904	Box 4
Bastian: "On the origin of flagellate monads and of fungus-germs from minute masses of zoogloea." Clippings from <i>Nature</i> , 1904	Box 4
Bastian: "The simplest kind of protoplasm." Offprint from <i>Knowledge and Scientific News</i> . Pencil correction in Bastian's hand, 1905	Box 4
Bastian: "On the occurrence of certain ciliated infusoria within the eggs of a rotifer, considered from the point of view of heterogenesis." Offprint from <i>Proceedings of the Royal Society</i> , 1905	Box 4
T. Fisher Unwin: Royalty agreement. Printed document completed in manuscript; signed and docketed by Bastian. 4 pp. Concerning Bastian's <i>Nature and Origin of Living Matter</i> , 1905	Box 4
Bastian: "On the heterogenetic origin of certain ciliated infusoria from the eggs of a rotifer." Autograph manuscript (includes printed matter with Bastian's revisions). 24ff., 1905	Box 4
Bastian: "On some heterogenetic processes." Typescript with Bastian's manuscript additions of a lecture given on Mar. 15, 1906. 8 pp. 2 sheets with signatures of lecture attendees attached, 1906	Box 4
Review of Bastian's <i>The Evolution of Life</i> . Extract from <i>Times Literary Supplement</i> , 1907	Box 4
Methuen & Co.: Statement of account for <i>The Evolution of Life</i> . 1 sheet, 1907	Box 4
Bastian: "Sull'origine ex novo di bacterii, bacilli, vibrioni, micrococchi, torule e muffe [molds] in certe soluzioni saline..." Offprint from <i>Reale Accademia dei Lincei</i> , 1907	Box 4

Bastian: "The functions of the kinaesthetic area of the brain." Offprint from <i>Brain: A Journal of Neurology</i> , 1910	Box 4
"A startling scientific discovery." Cutting from Putnam's advance list advertising Bastian's <i>Origin of Life</i> , 1911	Box 4
Marmol, F. T. del: "A problem of latter-day mineralogy: To what extent are minerals sensitive?" Extract from <i>The Academy</i> . Mentions Bastian's work, 1913	Box 4
Bastian: Autograph notes, beginning "What are the primordial living units?" 1 sheet, 1914	Box 4
Who's Who in Science: clipping of Bastian's biography, 1914	Box 4
Bastian: "Experimental data in evidence of the present-day occurrence of spontaneous generation." Offprint from <i>Nature</i> , 1914	Box 4
Bastian: "The production at will of either fungus-germs, flagellate monads or amoebae from the ultimate segments of small masses of zoogloea." Offprint from <i>Nature</i> , 1914	Box 4
Receipt made out to Bastian for one pound and one shilling, 1914	Box 4
Bastian: "The forms of lower organisms as dependent upon molecular constitution and environmental conditions." Offprint from <i>Lancet</i> . 3 copies, 1915	Box 4
Bastian: "The importance of tyrosine as an aid in the demonstration of the present-day de novo origin of living organisms." Autograph manuscript. 6ff., 1915	Box 4
Bastian: Photos for blocks needed—if any. New edition of "Nature and Origin of Living Matter." Set of 17 photomicrographs with autograph manuscript annotations, plus 2 sheets of Bastian's pencil notes, in envelope, 1910	Box 4

Bastian: "La generación espontanea su realidad y lo que ella implica." Offprint from La Semana Medica. Two copies, 1915	Box 4
Pratelle, Aristide: "Ma visite au Fairfield studio." In La Libre Pensée Internationale. Whole issue, 1916	Box 4
Clipping from Nature concerning Bastian's work, 1917	Box 4
Copies of letters published in The Lancet on the origin of life: The work of the late Charlton Bastian. Carbon typescript. 27ff., 1919	Box 4
Bastian: Attention and Volition. Autograph list of recipients of copies. 1 sheet, undated	Box 4
Bastian: Copies of Paralyses. Autograph list of recipients of copies. 1 sheet, undated	Box 4
Bastian: Hysterical or Functional Paralysis. Autograph list of personal and journal recipients of copies. 1 sheet, undated	Box 4
Bastian: Autograph document containing excerpts from favorable reviews of one of Bastian's neurological publications. 1 sheet, undated	Box 4
Bastian: "Questions re a case of agraphia." Autograph manuscript. 1 sheet, undated	Box 4
Bastian: "Aud. centre...Visual centre..." Autograph document. 1 sheet, undated	Box 4
Bastian: Organ of Mind. Autograph list of recipients of copies. 1 sheet, undated	Box 4
Bastian: Autograph list of names. 1 sheet, undated	Box 4
Bastian: Autograph numbered list of names. 1 sheet, undated	Box 4
Bastian: Transv. Lsns of Sp. Cord. Autograph list of recipients. 1 sheet, undated	Box 4

Bastian: Papers concerning "Sensation and Movement" . Autograph list of recipients. 1 sheet, undated	Box 4
Bastian: Autograph document containing excerpts from favorable reviews of one of Bastian's neurological works. 1 sheet, undated	Box 4
Bastian's Paralyzes, review clipped from an unidentified newspaper, undated	Box 4
Bastian: Autograph notes written on the back of an envelope, undated	Box 4
Bastian: Autograph document containing excerpts from favorable reviews of one of Bastian's neurological works. 3 pp., undated	Box 4
Bastian: Modes of Origin of Lowest Organisms. Autograph accounting document, undated	Box 4
Bastian: Autograph document containing excerpts from favorable reviews of one of Bastian's neurological works. 1 sheet; envelope addressed to Bastian pasted to the sheet, undated	Box 4
Bastian: "Facts and reasonings concerning the heterogenous evolution of living things." Reprinted from Nature, nos. 35, 36, 37. 26 pp., undated	Box 4
Bastian: Relativity of knowledge. Autograph manuscript. 10 pp., undated	Box 4
Bastian: "On the heterogenetic origin of certain ciliated infusoria from the eggs of a rotifer." Autograph manuscript with some printed material amended in manuscript. 3 pp., undated	Box 4
Bastian: "Art. on Aphasia sent to above 68 persons..." List of names in another hand with annotations by Bastian. 3 pp., undated	Box 4
Bastian: "It has been suggested to me by a distinguished botanist..." Autograph manuscript. 3 pp., undated	Box 4

Bastian: Manuscript notes concerning brain weights of eight notable men, undated	Box 4
Bastian: List of names with numbers and calculations. 1 sheet, undated	Box 4
Bastian: List of recipients of Organ of Mind. 1 page, undated	Box 4
Bastian: "The development of..." 1 sheet, undated	Box 4
Favorable reviews of Bastian's work. 1 page, undated	Box 4
Bastian: Alphabetical letters in another language (Farsi?). 1 page, undated	Box 4
Bastian: "The latter is a remarkable mould..." . 2 pp., undated	Box 4
Bastian: List of 80 recipients. 2 pp., undated	Box 4
Bastian: List of journals on a Williams and Norgate letterhead. 2 pp., undated	Box 4
The British Medical Journal: "The Central Nervous Pathways for General Sensibility" , undated	Box 4
Caribbeana, undated	Box 4
Fray Mocho en Londres. Newsletter in Spanish concerning the International Congress of Medicine in London; mentions Bastian, 4 pp., undated	Box 4
Librairie Germer Bailliere: List of publications. 4 pp., undated	Box 4
Wilberforce, Archdeacon: "More than Father." . 1 page, undated	Box 4
Unidentified author: List of names in French. 1 page, undated	Box 4
Photograph of mushrooms and portion of postcard with biological photograph. Note	

on verso: By Bastian Wade, Esqr., Blue Town,
Sheerners(?), undated

Box 4

Plate V, Finished proof: 7 proofs of micrographs,
undated
