Summary

Collection Title:

Raymond C. Battalio and John B. Van Huyck papers, 1949-2014, bulk dates 1972-2014

Creator:

Battalio, Raymond Charles; Van Huyck, John B.

Source:

Economists' Papers Archive

Abstract:

Raymond C. Battalio (1938-2004) and John B. Van Huyck (1956-2014) worked together as professors of economics at Texas A&M University. This collection primarily documents their professional lives through their correspondence, writings, research (especially experiments), and professional and faculty activities. It was acquired as part of the Economists' Papers Archive.

Extent:

90 Linear Feet (66 record cartons and 15 electronic records boxes.)
56.2 Gigabytes (10 sets.)

Language:

Materials in English.

Collection ID:

RL.11714

Background

Scope and Content

The Raymond C. Battalio and John B. Van Huyck papers document their careers as economists at Texas A&M University (TAMU), particularly their work developing the field of experimental economics in the 1990s. Their papers are combined in one collection given their close working relationship.

The primary subjects are behavioral game theory, experimental economics, and macroeconomics. There are records related to Battalio's presidency of the Economic Science Association, Van Huyck's activity for Experimental Economics, and the founding of the Economic Research Lab at TAMU.

The most common type of material by far is research files on experiments, but there are also many correspondence files, manuscript files for writings and referee reports, course files for teaching, and files for their professional activities as economists. To a lesser extent, there are university and department files for their activities as faculty members, plus personal files from Van Huyck (especially academic coursework and family material).

The greatest amount of professional correspondence is with Charles Holt, David Levine, Thomas Palfrey, Charles Plott, Alvin Roth, and Larry Samuelson. Battalio and Van Huyck communicated with many contributors to experimental economics, and there is a lesser amount of correspondence with James Andreoni, Colin Camerer, John Kagel, and Vernon Smith.

This collection contains 1,309 floppy disks, 245 optical disks, six hard drives, five quarter-inch cartridges, and three USB thumb drives. Most or all of them belonged to Van Huyck, and he migrated files and folders to newer storage mediums over time and created backups for security or home use. Electronic records from most of these items have been copied to a server and are available. 137 installation disks for software were retained (but not copied) for possible emulation in the future; a separate inventory of them is available by request from Research Services.

Biographical/Historical

Raymond C. Battalio (1938-2004) and John B. Van Huyck (1956-2014) were both white American academic economists who spent their entire careers at Texas A&M University (TAMU; 1969-2004 and 1984-2014, respectively).

Battalio earned a BS in economics from the University of California, Berkeley in 1966 and a MS and PhD from Purdue University in 1968 and 1970, respectively, where he was supervised by Robert Basmann. He was one of the 12 founders of the Economic Science Association (ESA) in 1986 and served as its third

president from 1988-1989, and he and Van Huyck founded the Economic Research Laboratory in 1997. He was married to Nancy Battalio, had three sons (Robert, Joe, and Eric Battalio), and was a US Navy veteran.

Van Huyck was the Rex B. Grey Professor of Economics at TAMU. He earned a BA in economics from the University of Virginia in 1979 and an MA and PhD from Brown University in 1982 and 1986, respectively, where he was supervised by Herschel Grossman. He was also active in the ESA and served as a board member. He was married to Patsy Johnson, had three sons (Carl Phillips, Don Ashfield, and Bjorn Bennett Van Huyck), and was a Cub Scout den leader.

Battalio began designing experiments in the 1970s to test consumer demand theory in token economies with John Kagel, and he also studied individual choice behavior in pigeons, rats, and humans; this work had broad appeal and was widely published in economics and psychology journals.

Van Huyck's early work was on sovereign debt and macroeconomics with Herschel Grossman, and it led him to develop an interest in coordination failures and studying these specifically through experiments with Battalio.

They are primarily known for their lab work on the problem of multiple equilibria in game theory. Along with Richard Biel, they carried out a series of experiments on coordination that began with the minimum-effort coordination game in 1990. Among their other experiments were ones on the emergence of conventions, chaotic dynamics, decentralized allocation, and average opinion and peasant-dictator games.

[Return to Table of Contents](#)

Arrangement

The Raymond C. Battalio and John B. Van Huyck papers are arranged into six series: Correspondence, Conferences and Consulting, Writings, Research and Notes, Experiments, and Academia.

Acquisition Information

The Raymond C. Battalio and John B. Van Huyck papers were received by the David M. Rubenstein Rare Book and Manuscript Library as gifts in 2016.

Processing Information

Processed by Jonathan Cogliano, 2020; Elizabeth Berenguer and Zachary Tumlin, 2023.

Accessions described in this collection guide: 2016-0128 and 2016-0222.

This material arrived from Battalio and Van Huyck's offices at Texas A&M University and was treated as one collection. Original order was preserved when possible, but substantial rehousing and arrangement was necessary for most of the collection, particularly experiment files. Experiment files were originally housed in one of two ways: 1) paper participant response forms were bound by rubber bands and stacked in collapsible pocket folders and 2)

printouts of experiment data and other files were kept in three-ring binders alongside related digital media. Most experiment files were labeled with a code denoting the experiment type. In some cases, it was possible to connect experiment codes to specific topics in publications, but this was not possible in all cases. In these cases, generic classifications were made in the arrangement.

Use Restrictions

The copyright interests in this collection have not been transferred to Duke University. For more information, consult the Rubenstein Library's Citations, Permissions, and Copyright guide.

Collection Inventory

Correspondence, 1983-2009

Access Restrictions:

Access restricted. Some materials are personnel records. Records, such as search committee files or others pertaining to employment where individuals are identified, are closed for 70 years.

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Access note. Some materials are fragile audio formats that may need to be reformatted before use. Contact Research Services for access.

Scope and Contents

Battalio and Van Huyck's correspondence, which is mainly professional in nature and with other economists, especially Charles Holt, David Levine, Thomas Palfrey, Charles Plott, Alvin Roth, and Larry Samuelson. Topics include the exchange of papers and research material, referee activity, and paper submissions. Organized into three subseries to preserve their original order: Alphabetical Correspondence (for Van Huyck), Chronological Correspondence (for Battalio), and Email Correspondence (from Van Huyck's computer disk drives).

Alphabetical Correspondence, 1983-2006

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Access note. Some materials are fragile audio formats that may need to be reformatted before use. Contact Research Services for access.

Scope and Contents

Van Huyck's correspondence, sometimes on behalf of himself and Battalio and almost entirely professional. Topics include the exchange of papers and research material, referee activity, paper submissions, and job searches and offers, and the largest amount is with Larry Samuelson. Arranged alphabetically by last name of correspondent or organization/institution.

Scope and Contents

Proposal evaluations.

Sibley Report, 1993

Box 64

Scope and Contents

Van Huyck consulted on questions of milk pricing and cartel practices for legal case involving Kroger and Texas.

[Return to Table of Contents](#)

Writings, 1972-2014

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Scope and Contents

Material such as correspondence, drafts, supporting research material, referee reports, and reprints related to Battalio and Van Huyck's published and unpublished writings. The largest files are on "Dynamic Monetary Control and Interest Rate Stabilization," "Evidence on Learning in Coordination Games," and "Optimization Incentives and Coordination Failure in Laboratory Stag Hunt Games." Organized into three subseries: Articles and Book Chapters, Referee Reports, and Special Issue of Experimental Economics in Honor of Battalio.

Articles and Book Chapters, 1972-2014

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Scope and Contents

Includes correspondence, drafts, reprints, and supporting research material (typically experiment data). The largest files are on "Dynamic Monetary Control and Interest Rate Stabilization," "Evidence on Learning in Coordination Games," and "Optimization Incentives and Coordination Failure in Laboratory Stag Hunt Games."

Battalio and Van Huyck coded their experiments to indicate type and vintage (see the Experiments series for more details). Experiment codes appearing in this subseries also appear in the Experiments series, possibly allowing connections to be made between published writings and experiment files. The most frequently used codes are as follows: BB are beauty contest games inspired by Keynes's famous example of the workings of financial markets; C or CONV followed by a number are experiments on conventions; CR or CRAW followed by a number are coordination games; DEC followed by a letter and/or number or DX followed by a number are on decentralized allocation decisions; and PD followed by a number are peasant-dictator games. Less frequently used codes can be found in the Other Experiments and Related Materials subseries.

Experiments, 1986-2013

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Access restricted. Some electronic files in RL11714-SET-0008 contain personally identifiable information (PII) that has not been redacted. Contact Research Services for more information.

Access note. Some materials are fragile audio formats that may need to be reformatted before use. Contact Research Services for access.

Scope and Contents

Material such as correspondence, experiment data (response sheets, tabulated responses, and printouts of data), statistical data analysis of results, participant instructions, and design notes for Battalio and Van Huyck's experiments on economic decision making and interactions. Data analysis was typically done with software, such as SAS, Stata, and Mathematica, and this series features a majority of the electronic records and audiovisual material.

Battalio and Van Huyck coded their experiments to indicate type and vintage (some experiments were conducted multiple times, presumably with extensions and modifications), and these codes are used as file titles when possible.

The most frequently used codes are as follows: BB are beauty contest games inspired by Keynes's example of the workings of financial markets; C or CONV followed by a number are experiments on conventions; CR or CRAW followed by a number are coordination games; DEC followed by a letter and/or number or DX followed by a number are on decentralized allocation decisions; and PD followed by a number are peasant-dictator games. Codes appearing in this series also appear in the Articles and Book Chapters subseries, possibly allowing connections to be made between published writings and experiment files.

Organized into eight subseries: Average Opinion, Chaos, Conventions, Coordination, Decentralized Allocation, Peasant-Dictator, Other Experiments and Related Material, and Uncategorized Electronic Records.

Average Opinion Games, 1988-2006

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Access restricted. Some electronic files in RL11714-SET-0008 contain personally identifiable information (PII) that has not been redacted. Contact Research Services for more information.

Scope and Contents

Files for experiments on asset markets, in which participants guess the average opinion of all participants involved. Arranged alphabetically by experiment.

Evolution of Conventions, 1990-1991 Box 37

Physical Description: 3 folders

Scope and Contents

Experiment data and experiment design notes.

Measuring Social Preferences (C9), 1998-2008 Box 41

Physical Description: 3 folders

Scope and Contents

Experiment data and statistical analyses.

Stag Hunt Games, 2013 Box 41

Scope and Contents

Questionnaires.

Stag Hunt Games (R1), 2000-2001 Box 41

Physical Description: 2 folders

Scope and Contents

Statistical analyses for stag hunt games with rule learning.

Coordination, 1987-2001

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Access note. Some materials are fragile audio formats that may need to be reformatted before use. Contact Research Services for access.

Scope and Contents

Files for experiments on coordination games. Several vintages of these experiments were conducted with multiple extensions. In some cases, there is apparent overlap between coordination experiments and experiments on the emergence of conventions. Arranged alphabetically by experiment.

Access restricted. Some electronic files in RL11714-SET-0008 contain personally identifiable information (PII) that has not been redacted. Contact Research Services for more information.

Scope and Contents

Material such as correspondence, university administrative files, student advising files, and teaching material that relate to Battalio and Huyck's careers as academic economists, plus academic coursework and personal material for Van Huyck. Organized into four subseries: Department and University Business, Supervised Dissertations and Theses, Teaching, and Van Huyck Coursework and Personal Items.

Department and University Business, 1984-2012

Access Restrictions:

Access note. Some materials are electronic records that require special equipment. Contact Research Services with questions.

Access restricted. Some materials are personnel records. Records, such as search committee files or others pertaining to employment where individuals are identified, are closed for 70 years.

Scope and Contents

Includes administrative files, such as for department and university committee service. The largest file is on the Economics Research Laboratory (ERL), which Battalio and Van Huyck founded in 1997 and used to conduct experiments. Arranged alphabetically.

Academic Program Standards Committee,
1994-1997

Box 15
